FALL 2011 EDUCATIONAL CATALOG

EDUCATIONAL PROGRAM ELIGIBILITY OVERVIEW

Bron Imaging Group requires our dealers to authenticate all qualified educational discount purchasers according to the following policies for appropriate identification. Bron Imaging Group reserves the right to make a case by case determination on participant eligibility for the program discounts as defined below.

PROGRAM ELIGIBILITY FOR STUDENTS, EDUCATIONAL INSTITUTIONS, FACULTY, AND INSTRUCTORS

STUDENTS

K-12

Qualified students enrolled in grades K-12 at an accredited public or private primary or secondary school providing full-time instruction that are enrolled in photography class or classes as part of an art or journalism program.

Higher Education

Full time students at higher education institutions defined as accredited public or private university or college (including community, junior or vocational college) that grants degrees requiring not less than the equivalent of two (2) years of full-time study who are enrolled in photography classes as part of an art, advertising, journalism, or commercial photography program.

EDUCATIONAL INSTITUTIONS

Educational institutions that teach a curriculum directed towards a student desiring a career in the field of photography.

K-12 Faculty & Instructors

K-12 qualified faculty, teachers, or instructors instructing in grades K-12 at an accredited public or private primary or secondary school providing full time instruction who are engaged in teaching photography as part of an art or journalism program.

Higher Education Faculty & Instructors

Full time faculty member or instructor at higher education institutions defined as accredited public or private university or college (including community, junior or vocational college) that grants degrees requiring not less than the equivalent of two (2) years of full-time study who are engaged in teaching photography as part of an art, advertising, journalism, or commercial photography program (part time faculty or instructors at qualified institutions may be eligible for the educational discount but only on a case by case basis).

REQUIRED IDENTIFICATION AND FORMS

STUDENTS

For a purchase by student, appropriate identification means clear, readable copies of the following documents:

A current, valid photo identification and valid evidence of current enrollment in an accredited educational institution. Examples include without limitation: school photo identification cards that include date validating current status as student, copies of current course curriculum with a valid date and printed with the educational institution logo or seal, or official letters from the dean or principle of the educational institution stating student is enrolled full time in a photography program.

EDUCATIONAL INSTITUTIONS

For a purchase by an educational institution, appropriate identification means valid, official purchase orders or checks issued by an educational institution or the school district of the primary or secondary school, current credit card information with the proper name, billing address, and 'ship to' or delivery address of the educational institution or school district or school, or a current personal credit card or check payment from individuals who are faculty or staff with a 'ship to' or delivery address of the educational institution or school.

FACULTY & INSTRUCTORS

For a purchase by faculty, teacher or instructor, appropriate identification means clear, readable copies of the following documents: A current, valid photo identification and valid evidence of current employment by an accredited educational institution. Examples include without limitation: school photo identification cards that includes date validating current status, school photo identification or drivers license or other official photo identification with corroborating evidence including but not limited to: faculty or staff pay check stubs; course curriculums taught with a valid date and printed with the educational institution logo or seal; or an official letter from the dean or principle of the educational institution.

Sync Cable
Carrying Case

Broncolor Mobil A2L - Lithium and LED

In the continuous strive for progress and optimization, Broncolor has undated the Mobil A2R battery power pack with lithium technology. Featuring all the power and portability of the A2R, the new A2L with lithium battery offers 220 flash releases instead of 170 per battery charge, and weighs only 14.7 pounds. The new MobilLED lamp heads feature the world's first 30 watt (100w halogen equivalent) LED modeling light, thus reducing power drain on batteries and extending the service life. The 5500k color temperature of the MobilLED opens up completely new horizons for the production of video sequences, allowing seamless transition between still and motion photography.

SINAR p3 DSLR CONVERSION SETS

The Sinar p-slr was designed especially for photographers who would like to combine the convenience of digital single lens reflex cameras with the advantages and quality characteristics of a Sinar view camera. Exact control of perspectives and selective sharpness - the most important creative tools in photography - can be set and evaluated precisely on a view camera. And now, Sinar has made these advantages available to the users of 35mm SLR cameras. The well thought-out solution brings a significant enhancement to the image quality of 35mm cameras. Photographers can now integrate the high-resolution digital Rodenstock lenses into their SLR systems. The Sinar p-slr continues with the Sinar legacy, offering photographers modular systems that are in keeping with the latest trends of the market.

PROFESSIONALISM IN THE DETAILS

The Sinar p-slr can be used with all Canon and Nikon single lens reflex cameras currently on the market. Thanks to the quick locking adapter supplied with the Sinar p-slr, the format can be changed from vertical to horizontal with only a few motions and within seconds. If the single lens reflex camera is controlled by a computer, the integrated support for the cable ensures the safety and the protection of the USB / Fire Wire socket on the camera. A positioning- and centering aid serves for the exact positioning of the digital single lens reflex camera on the optical axis. That ensures that the sensor of the digital camera is positioned perfectly for vertical as well as horizontal exposures. This function is essential for making full use of the advantages of the view camera and for working professionally. A summary of the advantages:

- Unlimited creativity in composing an image
- Unrestricted use of an existing single lens reflex camera
- Cost-effective use of an existing Sinar view camera for digital solutions
- Quick change from the vertical to a horizontal format
- Adapters for a variety of 35mm cameras
- Unique expansion possibility for a live image by means of an additional monitor
- Increased quality by the use of digital medium format and view camera lenses
- Support for USB and power supply cables
